Senior PHP Developer

We're Hiring: PHP Developer (Remote | Project-Based | USD)

Career Mint is hiring an experienced **PHP Developer** to work on project-based assignments for international clients. This is a remote role with flexible working hours and compensation in **USD**.

Engagement Type

- Project-based / Freelance
- Fully remote
- Flexible working hours
- Paid in USD (per project or milestone-based)

Experience Required

- **4–5 years** of professional PHP development experience

Key Responsibilities

- Develop, maintain, and optimize PHP-based web applications
- Work with frameworks such as **Laravel** (preferred) or CodeIgniter
- Integrate third-party APIs and payment gateways
- Write clean, scalable, and well-documented code
- Collaborate with front-end developers, designers, and project managers
- Troubleshoot, debug, and enhance existing systems

Technical Skills Required

- Strong proficiency in **PHP**
- Hands-on experience with **Laravel**
- Solid understanding of **MySQL / relational databases**
- Experience with RESTful APIs
- Familiarity with Git/version control
- Basic understanding of security, performance, and scalability best practices

Nice to Have

- Experience working with international or remote teams
- Exposure to cloud environments (AWS/Azure)

- Knowledge of modern front-end basics (HTML, CSS, JavaScript)

Why Work With Us

- Work on global client projects
- Flexible, outcome-driven work model
- Opportunity for long-term collaboration based on performance
